

BlackBerry Enterprise Server 5.0 Upgrade

▶ BES 5.0 officially launched

Mike Lazaridis, CEO at Research In Motion, mentioned during his Keynote at WES 2009 that BES 5.0 is the most tested BES version ever. Needless to say BES 5.0 has been available to several key customers and partners including GPXS for over nine months as part of a rigorous BETA testing program. RIM informed us at WES that to date, over a hundred customers like Linklaters, ReedSmith, Coca Cola and Metro Group have migrated to the new BES 5.0 solution, including RIM itself with over 20.000 BlackBerries

As with any other new software or software upgrade, IT professionals will be faced with new challenges as part of the upgrade and migration. GPXS consultants have received advanced training by RIM professionals to help you execute your upcoming migration projects. We have introduced two unique BES 5.0 upgrade packages to address your needs.

BES 5.0 Upgrade Essentials

3.250 euro

- ▶ standard BES 5.0 impact assessment
